ACCELERATE TIME TO MARKET WITH QUALITY ENGINEERING

While digital transformation is reshaping the IT industry, applications are proliferating at an exponential rate and making it harder for businesses to meet ever-changing consumer demands. Companies are compelled to rethink their business models to improve profitability and flexibility with zero compromise on quality, security and customer satisfaction. To achieve success, companies are adopting agile and DevOps technologies and processes. Test engineers are under a great pressure to offer value beyond just testing. This is where the need arises to shift from a quality assurance-focused approach to a quality engineering-focused approach.

Deliver Next-Generation Apps Quickly and Cost-Effectively

OSI Digital has deep experience in delivering robust Quality Engineering services with reliable testing processes that adhere to the highest level of testing standards. Our market-driven testing approach helps customers identify and eliminate redundancies in costs, infrastructure and processes while ensuring smoother and faster applications.

With 25 years of successful industry experience in executing multiple testing engagements, our technical expertise and structured project management methodology makes us a reliable partner of choice for your business for delivering high quality and cost effective testing solutions to:

> Speed-Up Time to Market
> Increase Revenues and ROI
> Enhance Customer Satisfaction
> Drive Business Growth

Our market-driven testing approach helps customers identify and eliminate redundancies in costs, infrastructure and processes while ensuring smoother and faster applications.

Our Experience

> **350+ Successfully Tested Applications**

> **50+ Frameworks Developed**

> **25 Years of Experience in Testing Services**

> **50+ Global Clients**

> **200+ QA Engineers**

OSI Digital

Features

> **Multi-layered Test Automation:** Automating regression testing at all the UI, Web Services and Database layers for frequent execution throughout the testing cycle.

> **All Round Testing in a Single Package:** All the testing services like manual, automation, security and performance are provided in a single package at a reasonable price.

> **DevOps Quality Assurance (QA):** Our QA team works in tandem with the DevOps engineers to ensure a quick resolution of any issue reported in the continuous testing flow.

> **Self-descriptive Acceptance Automation Tests:** We follow a behavior-driven development (BDD) approach to create test cases that are easily understood by business, development, testing teams and other stakeholders for better collaboration. The same test cases can be used to build the automation scripts too.

The OSI Digital Difference

> **Test Center of Excellence:** Our test center leverages the latest tools and technologies to deliver business objectives such as quickly launching applications and services with best quality, competitive advantage and reduced cost.

> **Expertise:** OSI Digital has decades of experience in testing services and our team of 200+ test engineers ensure best quality service with speed and security demanded by today's applications.

> **Quality First Mindset:** Our testing services cover a greater number of devices, technologies and test engineers to offer a robust and cutting-edge testing solution with near-zero defect quality.

> **Cost Efficiency:** OSI delivers cost-efficiency by focusing of efficient resource models, proven quality assurance frameworks, tools and techniques to improve productivity.

> **Delivery Excellence:** We follow a metrics-driven approach and benchmarking process to provide a best-in-class service.

> **Multiple Platforms and Industries:** OSI testing expertise spans across major platforms with customized services for testing applications in all industries.

> **Consulting Services:** Consulting is our flagship service. Be it developing detailed process improvements or a roadmap for software quality, our tools, best practices, evaluation frameworks and proven methodologies have helped us deliver a perfect test consulting engagement for our customers.

Our Results

> Early detection of bugs using risk-based test strategy

> Assured first time right quality with superior customer experience

> SLA driven model with zero severity level 1 & 2 production incidents

> Open source tools with zero license costs

> Improved testing effectiveness to 95%

> Efficient test coverage using flexible test approaches

> End-to-end test automation with optimal human resource utilization and faster test cycles resulting in savings worth millions of dollars

> Flexible delivery engagement models with round the clock coverage

> Accelerated time-to-market by 20% with faster product releases and new services

About OSI Digital

OSI Digital, Inc., (formerly OSI Consulting, Inc.) provides purpose-built business and technology solutions that optimize performance to enable data-driven outcomes for our customers. OSI accelerates digital transformation by offering integrated solutions that capture, secure, integrate, analyze and optimize data. Our services include the design, development and implementation of new solutions as well as the ongoing management, enhancement and support of our customers' existing business systems.

OSI Digital was founded in 1993, in California and has since expanded to a team of over 1,400 employees worldwide. We have offices in the US, Canada, India, Philippines, Dubai and Australia. Our main offshore delivery center of excellence is located at our state-of-the-art campus in Hyderabad, India, with additional locations in Chennai, Delhi and Bangalore. For over 25 years, we have supported a diverse portfolio of customers across various industries, including: Software & Business Services, Financial Services, Life Sciences & Healthcare, Manufacturing, Energy, Retail and Agriculture.

Our client base ranges from start-ups to Fortune 500 corporations, including: Exelon, GE, Hyundai, Toyota, Gilead, Allergan, Yamaha, Gap and Skechers. OSI Digital has developed strong partner alliances with the world's leading technology providers such as Tableau, Salesforce, Oracle, Microsoft, GE, Amazon Web Services, Dell Boomi and Red Hat.
