

AGILE APP DEVELOPMENT TO
IMPROVE BUSINESS PROCESSES
AND OUTCOMES

Develop, Deploy and Monetize High Productivity Apps

At OSI Digital, our Software Engineering experts bring the capabilities and discipline to speed the time to market, delivering projects on time, on budget, and with a commitment to quality. These are key advantages in a competitive and strategic business landscape.

Software Engineering Center of Excellence

OSI provides all the capabilities of a large consulting company but with the flexibility and agility of a specialized firm. Flexibility is one of our greatest strengths, coupled with broad industry experience to handle the most complex projects. Organizations are under tremendous pressure to deliver quality solutions faster and cheaper. OSI prides itself on its Software Engineering Center of Excellence which offers a variety of IT solutions that deliver world-class innovation to improve how your business functions.

Flexibility & Customized Solutions

At OSI, we respond quickly to our customer needs. Approaching each project with top talent, attention to every detail, and 24/7 support—both on or off shore—ensures improved business efficiencies at a lower cost. We are technology independent and capable of creating solutions to integrate with your business systems in an open source environment.

Our global support organization will build a relationship with you and your team, working diligently as an extension of your IT resources. Our global team of software engineering experts work together to provide 24/7 operations support across all time zones.

Our Customers

- > GE Digital
- > Bit Stew Systems

- > Skechers
- > The Gap

OSIDigital

OSI Software Engineering Capabilities

We provide unmatched software engineering capabilities in the following technical areas:

Application Planning and Assessments

- > Gather customer strategic and business requirements
- > Align business strategy to technical enablement
- > Assess condition of existing portfolio
- > Provide recommendations for upgrades, re-engineering, new product introduction, or migrations
- > Develop IT strategic roadmap

Product Development

- > Develop the perfect mix of practical solutions to align with customer's strategic requirements
- > Assess customer's current Product Development Capability Model and derive a well-defined and executable product release roadmap
- > Deploy technology solution to desired functionality, providing ROI
- > Combine Rapid Implementation Solutions with Quality Assurance Services automation to significantly reduce time to market for product releases

Development Support

Support the development of a wide range of applications:

- > Web Applications
- > Mobile Applications
- > E-Commerce
- > Smart Clients

- > Web Services
- > SOA Patterns
- > Social Media Applications
- > Rich Internet Applications

Mobile Application Development

OSI can take your current desktop applications and make them mobile friendly. We can mobilize your tasks and workflows (such as ERP functions) and optimize your website for mobile devices. We have the technical capabilities and expertise to manage the complexity of mobile application you are looking to develop.

Cloud Application Development

Cloud development platforms create fluidity in business processes and can allow companies to take advantage of either Public or Private Platform-as-a-Service (PaaS) providers. OSI can help customers migrate existing applications, including:

- > Legacy to Next-Gen platforms
- > Migration to .Net and Open Source technology Analytics
- > Migration from Web to SharePoint solutions
- > Re-platforming migrations (i.e. Java & .Net)
- > Develop applications leveraging Cloud services (Examples: AWS, Azure, Google)

Custom Application Development

Our talented team of multi-shore resources can provide companies with customized application development. Our team is well-versed in open source technologies that translate into more cost-effective solutions.

- > Our software engineering teams leverage world-class channel partners
- > We implement repeatable frameworks and patterns to accelerate development cycles and time to market
- > Support customers with major application upgrades
- > Modernize existing applications to align to latest business needs

eCommerce Development

OSI's eCommerce Services will provide your business with the tools necessary for a unified view of your customer while delivering consistent value. To remain competitive in business today, multiple customer touch points are necessary, so it is critical that your eCommerce systems deliver maximum value. Our team of skilled resources can help you:

- > Upgrade your existing applications
- > Develop new B2B & B2C solutions
- > Evolve your existing client server application and enable it to the Web

OSI Digital

Quality Assurance

OSI Digital accelerates the QA cycle with our automated testing methodologies that can improve the accuracy of testing, speed of implementation and time to market. OSI offers end-to-end management of the QA cycle from Test Strategy Development, Test Management, and Test Execution and Maintenance, all aimed at providing our customers with improved quality of code and less costly outages.

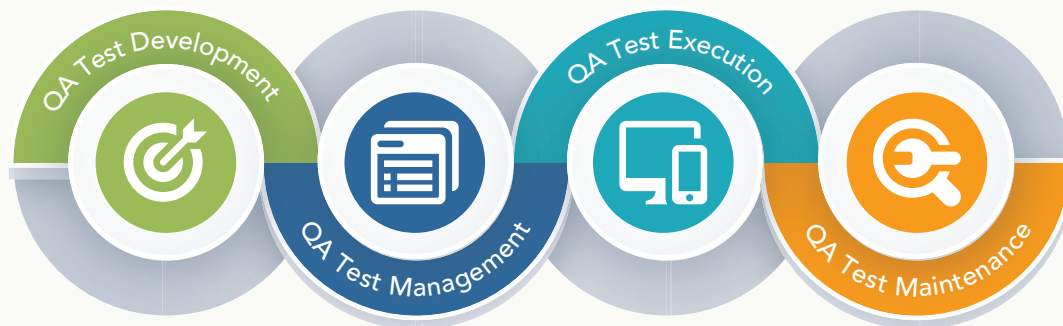

We help strengthen and mature your existing QA capabilities by delivering a value chain that interlocks various QA stages to ensure defects are discovered early in the process, leading to an optimal quality production-level product.

OSI offers comprehensive application and system testing services designed to ensure system functionality with reliable testing processes while adhering to the highest level of testing standards:

- › Manual and Test Automation
- › White Box and Black Box Testing
- › Integration and Regression Testing
- › Performance Testing
- › Innovative Solutions Using Commercial and Open-Source Tools
- › Test Lab with Various Versions of Platforms and Devices

Quality

Find out why more than 90% of our customers return to work with us. For over 25 years, we have perfected our methodologies. At OSI, we have a breadth of exposure to multiple industries and business areas. Over multiple decades, we have perfected our methodologies and understand how to deliver best-of-breed solutions across diverse industries. Partner with OSI to bring greater time to value for your business. Work with us and see the difference.

OSI Digital

About OSI Digital

OSI Digital (formerly OSI Consulting) provides purpose-built business and technology solutions that optimize performance to enable data-driven outcomes for our customers. OSI accelerates digital transformation by offering integrated solutions that capture, secure, integrate, analyze and optimize data – the new digital currency for customer success. Our services include the design, development, and implementation of new solutions as well as the ongoing management, enhancement and support of our customers' existing business systems.

OSI Digital was founded in 1993, in California and has since expanded to a team of over 1,400 employees worldwide. We have offices in the U.S., Canada, Philippines, Dubai, and India. Our main offshore delivery center of excellence is located at our state-of-the-art campus in Hyderabad, India, with additional locations in Chennai, Delhi, Bangalore, and Pune. For over 25 years, we have supported a diverse portfolio of customers across various industries, including: Software & Business Services, Financial Services, Life Sciences & Healthcare, Manufacturing, Energy, Retail, and Agriculture.

Our client base ranges from start-ups to Fortune 500 corporations including: Exelon, GE Digital, Hyundai, Toyota, Gilead, Allergan, Yamaha, Hitachi and Skechers. OSI Digital has developed strong partner alliances with the world's leading technology providers such as Tableau, Salesforce, Oracle, Microsoft, GE Digital, Amazon Web Services, Dell Boomi and Red Hat.
