

Transact Anywhere, on any Device

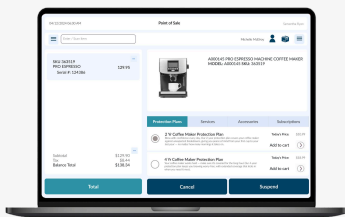

Today's retail landscape demands solutions that enable you to transact cost-effectively across all retail formats — from large stores to small, on-location with customers, or at special events.

Our POS solution is designed to manage the complexities of retail, so you can focus on your most important asset — your customers.

ADVANTAG^e POS Solution

Point of Sale

Create a convenient shopping experience by connecting with your customers wherever and however they prefer to shop.

Integrated Returns

Easy, user-friendly returns processing across all sales channels, creating a hassle-free customer experience.

Back Office

Our easy-to-use back-office solution provides powerful reporting capabilities, enabling you to streamline your operations.

Hybrid

OSI Digital offers a complete POS solution to manage you're business

Whether you're assisting a customer in-store, in their home, at a pop-up event, or over the phone, you can securely process sales and returns or answer questions on any device, from any location.

Personalized Customer Interactions

We create brand-driven loyalty experiences that build long-term relationships between your business and your customers. From personalized promotions to private shopping events, we ensure your customers' journey stays connected before, during, and after the sale.

Secure Payment Management

Payment security is essential to your business. With our EMV end-to-end certification, you can rest assured that our integrated payment processing solution helps significantly reduce the risk of fraud.

Powerful Operations Hub

Effectively and efficiently manage your business with our comprehensive back-office controls, including inventory management, item and pricing maintenance, reporting, and analytics – giving you the capability to set up merchandise and start selling within minutes.

Transact Anywhere

No matter how, where, or when your customers prefer to shop, OSI keeps your transactions connected and their experiences personalized – empowering you to bring the point of sale directly to them.

Omnichannel Inventory & Order Visibility

A near real-time view of inventory across your enterprise creates a seamless connection between eCommerce and in-store operations. This insight delivers a unified customer experience by leveraging customer profiles to view or modify orders with ease.

Rapid Innovation & Customization

To grow and retain loyal customers, you need differentiation. Whether you're revamping your loyalty program, seeking to improve cross-sell opportunities, or introducing a new sales model, we deliver innovative technology tailored to your business.
